EDUCATION

Full-Stack Web Development (Full Time)

Masai School, Bangalore:

04/2022 - 02/2023

Post Graduate Diploma in Computer Application (PGDCA)

Dr. C.V. Raman University, Bilaspur:

07/2019 - 08/2020

B.E (Electrical Engineering)

Dr. C.V. Raman University, Bilaspur:

08/2014 - 07/2018

TECHNICAL-SKILL

Java | Spring Boot | Microservices | MySQL | Hibernate | JPA | Github | Postman | Swagger | Postman | JUnit | Mockito | Spring Security | JWT | Docker | Jira | Agile | HTML | CSS | JavaScript | DSA

SOFT-SKILL

PROBLEM-SOLVING | TEAMWORK | ADAPTABILITY

Abhishek Das
Java Developer

PROFESSIONAL SUMMARY

Results-oriented and skilled developer having experience working with real-time projects. Having experience working with technologies like Java, Spring-Boot, MySQL, JUnit, Mockito, Github, docker, Jira, Agile etc. A solid foundation built through an industry-ready training program. Eager to grasp new software and technologies quickly. Capacity to produce high-quality code and collaborative teamwork through valuable contributions.

EXPERIENCE

Software Developer Intern   05-2023 to 09-2023
AFORV Private Limited, Bengaluru

- Developed web applications using Java, Spring-Boot, Microservices, MySQL etc. Resulting in loosely coupled, maintainable and scalable applications.
- Worked closely and collaboratively with the frontend team to implement the features and requirements.
- Participated in scrum calls and code reviewing sessions and provided feedback to other developers.

PROJECTS

Sunlife Health Care (BACK-END) - AFORV Private Limited

This project aims to oversee an online appointment system for patients, handle medical reports for both in-patients and out-patients, manage doctor and patient accounts, schedule and manage appointments, generate patient prescriptions, and record treatment details. It encompasses modules for Patients, Specializations, Doctor Registration, Appointments, and Slot Configuration.

Tech Stack: Java | Spring-Boot | Microservices | JPA | Hibernate | MySQL | Github | Postman | JUnit | Mockito | Docker | JWT | Jira | Agile etc.

Areas of Responsibilities:

- Analysing and understanding the requirements.
- Designed and implemented the project using Java, Spring Boot, Spring Data JPA, microservices and MySQL.
- Designed and implemented database schema, including tables, relationships, and indexes, to optimize query performance and bug fixing.
- Developed RESTful APIs for Entities enhancing system capabilities and enabling efficient data exchange and integration.

Insurance Management Platform (BACK-END)   🐙

This is an independent project that was completed in just five days. It involves developing a RESTful API for an insurance management system using Spring Boot. Spring Data JPA is utilized for data storage. The system has three main domain models - Client, Insurance Policy, and Claim.

Features: Policy creation | Claim | Signup | Login

Tech Stack: Java | Spring-Boot | Hibernate | MySQL | Spring Security | JWT | JUnit | Mockito | Swagger | Github

Areas of Responsibilities:

- Analysing and understanding the requirements.
- Designed and implemented database schema.
- Developed RESTful APIs for Entities according to the requirements.
